DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a method for identifying compounds that bind to a target of interest, classified in class 435, subclass 6.
 - II. Claims 15-19, drawn to a method of preparing a drug lead compound, classified in class 435 subclass 7.1.
 - III. Claim 20, drawn to a method for inhibiting the binding of a second biomolecule to a first biomolecule, classified in class 436, subclass 501.
2. Inventions I and II are independent and distinct inventions. Invention I is a method for identifying compounds that bind to a target of interest whereas Invention II is a method of preparing a drug lead compound. Invention I requires a step of screening and Invention II does not require this limitation. Also, Invention II requires covalently linking at least one member of a first set and Invention I does not require this limitation.
3. Invention I and III are independent and distinct inventions. Invention I is a method for identifying compounds that bind to a target of interest whereas Invention III is a method for inhibiting the binding of a second biomolecule to a first biomolecule.
4. Inventions II and III are independent and distinct inventions. Invention II is a method of preparing a drug lead compound that binds to a target whereas Invention III is a method for inhibiting the binding of a second biomolecule to a first biomolecule. The methods have different functions and different method steps.

Art Unit: 1641

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one group is not required for other restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
